THE OPPORTUNITY

SIP is advancing a solar photovoltaic programme with a target DC capacity of 400 MW_p. Pre-feasibility is completed. Technical and financial partners are sought to review the available work and agree the next development stage.

PARTNERS SOUGHT

Co-developers & IPPs

Development expertise and a proposed co-development framework.

Engineering & EPC partners

Review of technical work, further studies and delivery options.

Development capital partners

Assessment of development funding needs and investment criteria.

SUBSAHARAN'S CONTRIBUTION

Origination, local stakeholder coordination and partnership structuring through SIP, the infrastructure platform of Subsaharan Group. Scope, responsibilities and commercial terms are to be agreed.

NEXT STEP

Introduce your organisation, relevant references and proposed contribution. An initial qualification call will establish the fit and the appropriate confidential information exchange.

DISCUSS THE PROGRAMME
